

Made in Germany

A range of ergonomically designed eating and drinking aids from Ornamin

Developed in consultation with clinical experts and customer needs, this comprehensive range of eating and drinking aids is both functional and elegant.

Specifically designed for people suffering from Alzheimer's (a form of dementia), this colourful range of tableware is ideal for anyone with cognitive impairment or decreased visual capacity. Many items are also useful for people with impaired mobility or reduced motor skills such as Parkinson's disease.

In addition to symptoms such as forgetfulness, speech impediments and orientation difficulties, people with Alzheimer's struggle to distinguish items through colour contrast. Along with other issues such as depression or restlessness, this can result in a decreased appetite and a reduced consumption of both food and drink, which can lead to significant weight loss and dehydration.

Studies in clinical nutrition have shown a significant increase in both food and liquid intake when using tableware that offers a high colour contrast (when compared to the table or the food) – with red offering the highest contrast and therefore the most successful result.

Ornamin have applied these results to develop a comprehensive and functional range of contrasting eating and drinking aids, designed to help stimulate the appetite and orientate anyone impacted by contrast sensitivities. Made from lightweight yet sturdy melamine, the colour contrasting designs are easily recognisable and perfect for independent dining.

ORNAMIN
family tableware

Vital Series

A range of red and white contrasting tableware designed to stimulate the appetite and help people more easily see their food or drink due to the colour contrasting rims.

Each piece is designed for maximum functionality and ease of use, making it easy for anyone with cognitive impairment or other mobility limitations to dine with dignity and independence.

Thermo Series

An innovative range of tableware as simple as it is ingenious. designed to keep food warmer for longer, these products are ideal for slow eaters, ensuring that the meal or drink stays warm and flavoursome right to the last mouthful.

Through a special opening in the outer wall, the plate or bowl can be filled with hot water to help keep the food warm. at the same time, it helps reduce the risk of burns while keeping the heat on the inside where it is needed. alternatively, the tableware can also be filled with chilled water to help keep food items cold as needed.

Made from a high-quality melamine inner with an external thermoplastic material outer and two grip inserts made of a soft, non-slip silicone plastic. the handles provide a firm hold while also covering the fill holes to prevent the hot or cold water from spilling.

Thermo Plate and Bowl

- ❑ thermodynamic function helps contents stay warm or cool
- ❑ red and white colour for maximum contrast
- ❑ extra deep bowl and broad plate
- ❑ non-slip handles for added grip and stability
- ❑ anti-slip ring on base to stop unwanted movement
- ❑ replacement handles available (sold as pair)

cross section: fill the base with hot or cold

thermo Mugs

- ❑ thermodynamic function helps contents stay warm or cool
- ❑ large ergonomic handle for easy grip
- ❑ white interior ensures colour of drink is maintained
- ❑ Vital Thermo Mug offers conical shaped inner cup
- ❑ Glow-in-the-dark mug glows after exposure to light

Non-Slip Cup

More than just a colourful design, these innovative non-slip cups are made from a special non-slip material to ensure a firm grip even when hands are damp or trembling. available in a range of colour combinations, the contrasting designs help to orientate the hand to the middle of the cup.

The non-slip cup comes in two bright designs – a flower or measuring icon design. the vibrant colours of the flower design make it especially attractive to people suffering from visual or cognitive impairment, while the measuring icons make it especially easy to pour and record volume measurements. the measurement amount (in millilitres) is highlighted in the centre of each circle.

Use with the non-drip spouted lid for added safety against spillage.

NoN-Drip Spouted Lid

An optional accessory to suit most mugs or cups in the Ornamin range, this spouted lid can be sealed over the top of the cup to prevent leaks or spills.

The spout also makes it easier to drink without the need to tilt the head, and helps to control the flow of liquid. the user is required to gently suck to release the fluid, so controlling the rate of fluid release and minimising the risk of choking.

Promotes independence for anyone with limited mobility or dexterity, or anyone who struggles with ordinary drinking function following a stroke or other debilitating illness.

code 6972 □ weight 20g

Non-Slip placemats

Made of durable polypropylene, these non-slip placemats have a special coating on both sides of the mat to help when eating and ensure against unwanted slippage.

The anti-slip property of the top surface is guaranteed to hold dishes firmly and securely, ensuring the plate does not need to be held while eating. The special coating on the bottom surface prevents the mat from slipping on the table or eating surface. easy to wipe clean.

□ dimensions 395x275 mm

Non-Slipboard

The simple yet innovative design of this melamine non-slip board allows people with limited mobility or hand dexterity to prepare food or butter bread without the need for help. The clever design suits both right and left handed users.

Three sides of the board have a raised edge to hold bread or other food in place and prevent it from moving. The base on the board has an anti-slip ring to ensure the board remains secure on the preparation surface. These features make it easy to butter bread with just one hand.

Available in a range of bright colours, these boards can be stacked for optimum space saving in the kitchen. dishwasher safe.

Use with the optional food Preparation Aid to help hold fruit, vegetable or cheese.

□ weight 360g □ dimensions 220x170 mm
